

# An advanced skin resurfacing complex and wrinkle reducer

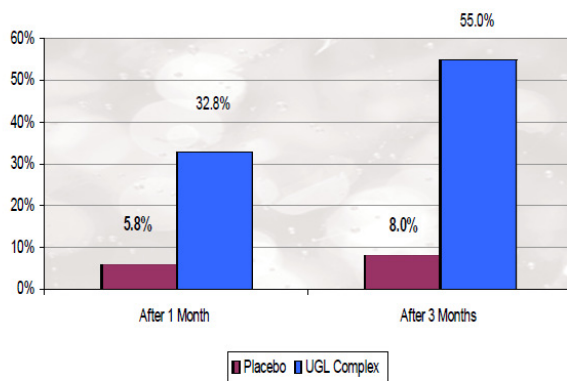

UGL Complex is a bioengineered complex of glucosamine HCl algae extract, yeast extract and urea, designed to exfoliate in the Ph conditions of the skin, while at the same time, calming the skin. UGL Complex is also an ant-aging complex.

## Clinical tests with UGL Complex have shown to improve proline incorporation and collagen synthesis.

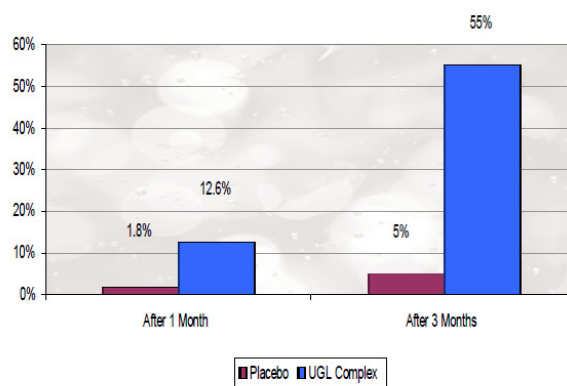

- **In 2 weeks:** softness improved by 33% as measured by profilometry and squame analysis
- **In 4 weeks:** smoothness improved by 45%, wrinkles improved by 33%, hydration by 44% and superficial skin firmness by 25%, sagging was reduced by 25%. Volunteers looked 7.5% younger.
- **In 12 weeks:** The UGL complex formula dramatically increased integral firmness (55%+). Wrinkles decreased by 55% and clarity increased by 45%.

CLINICAL STUDIES, 25 PEOPLE, UGL COMPLEX AT 3%, PH 5.5

Wrinkle Reduction - Clinical Grades

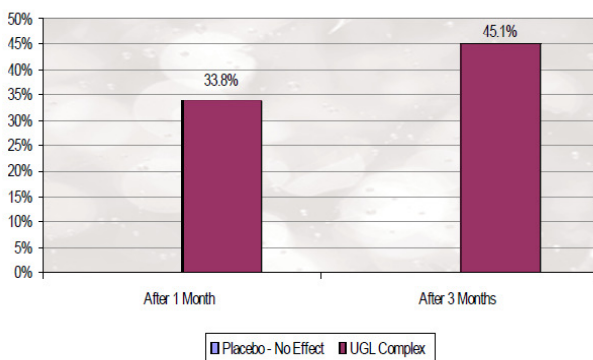

Integral Firmness (Firmness at Deeper Layers)

**NOTE: The consumer can perceive the benefits above 40%.**

Clarity (Minolta, a b and L Values) Chromometer

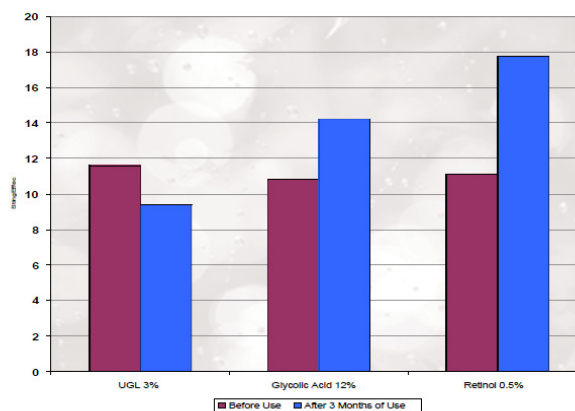

**NOTE: The consumer can perceive a clarity difference of 40%.**

\*After one month skin clarity increased by 34% and by 45% after three months. No changes were observed in the placebo-treated group.

Effect equivalent to 5% Lactic Acid at pH 3.5.

Skin Stinging & Sensitivity

**"Unlike Glycolic Acid and Retinol, UGL Complex has a calming effect"**
